OPALINE
SURFACES

THE STORY OF 15 YEARS

We are a product of choice and style. Our journey in this industry is a passion for exploring unmatched product selection, the reasons behind the best choice of a large market.

OUR STORY

THE 3 PILLARS OF

OPALINE

IDEATE AND INNOVATE

Where imagination begins. Crafting concepts shaped by nature, refined by design.

INSPIRE

Advancing surfaces through new textures, techniques, and thinking. Innovation that transforms possibilities into products.

RISE WITH INTEGRITY

Setting benchmarks for the industry with pioneering creations. Designs that elevate spaces and spark new ideas.

SUSTAINABILITY

IN EVERY TILE

Natural Gas Powered Kiln for Reduced Emissions

As part of our commitment to sustainable manufacturing, we operate advanced kilns powered by natural gas, a cleaner and more efficient energy source. This significantly reduces harmful emissions compared to conventional fuels, ensuring a lower environmental footprint while maintaining precise temperature control for consistent tile quality and durability.

Solar Energy Integration in Production

Strengthening our focus on renewable energy, we have integrated a solar power system that supports approximately 33% of our total production energy requirements. By harnessing clean solar power, we actively reduce dependence on non-renewable resources, lower carbon emissions, and move towards a more energy-efficient and environmentally responsible production process.

TOP OF THE LINE

INFRASTRUCTURE

At Opaline Surfaces, our modernized and well-furnished infrastructure unit supports our team-mates in the production process of our complete variety of qualitative surface products within an assured span of time.

FIRST IN INDUSTRY

Step away from the monotony of traditional tiles. While standard press-made tiles repeat the same pattern, our Double Digital Technology powered by System and Creavision creates a unique texture for every individual slab. Experience textures that never repeat, giving your space a natural, organic feel. With Creavision's advanced tracking, the design and texture align with absolute perfection, ensuring sharp, stunning visuals every time.

We apply brilliance only to specific design accents, creating a sophisticated play of light. Finished with a premium Dry Granilla top coat, our Ice Sparkle tiles offer a high-gloss, mirror finish that brings out the true depth and richness of every color.

At Opaline Surfaces, nature is our greatest source of inspiration. We closely study natural materials, textures, and color variations such as marble, stone, wood, and concrete and meticulously replicate their authentic character on tile surfaces.

Using advanced digital and surface technologies, we achieve remarkable depth, realism, and detail, capturing the true essence of natural elements. The result is tiles that offer the beauty of nature with the durability, precision, and performance of engineered surfaces.

TECHNOLOGY

ALWAYS STEP AHEAD APPROACH

Since its inception, Opaline Surfaces has constantly upheld the fundamental values Of great ceramic culture and combined them with the passion and outstanding craftsmanship. Our robust, controlled, flexible, and customizable production process by the use of innovative ceramic composite materials result in a range of products of aesthetic excellence, quality, and reliability. We have all the perfect infrastructure for manufacturing Perfectly technical porcelain/ vitrified tiles.

We utilize SACMI presses and kilns for forming and firing our tiles, ensuring high-density and strength.

We employ advanced APPEL planar machines for sophisticated tile quality analysis and precise sorting.

We leverage CREAVISION for double digital synchronizing to optimize flow and elevate printing quality.

Our color body technology uses LB color machines to create consistent and deep colors throughout the tile.

We use SYSTEM CERAMICS' high DPI printing digital machines for accurate and vibrant tile decoration.

We integrate the latest CONTINUA+ press technology for continuous forming and production efficiency.

QUALITY CONTROL

Statistic And Comprehensive Quality Management Systems Have Been Implemented With Global Standards Followed At All Stages To Ensure High-quality Products.

We Follow Process-wise Check- Points To Cope Up All Quality Parameter On Each Manufacturing Stage With A Combination Of Manual & Auto Mode.

Online quality control of our manufacturing from SACMI of Italy ensures that all the products go with the required quality parameters.

1. Creavision & barcode technology
2. Countinua plus
3. High dpi printing digital machine
4. Proper infrastructure to produce technical vitrified tile
5. Stringent Quality norms as per european standards
6. Audited certifications

EXPORTING COUNTRIES

Opaline Surfaces serves clients across **North America, Canada and beyond**, delivering premium natural stone, engineered quartz, and porcelain surfaces to architects, designers, distributors, and developers. Backed by global sourcing, precision manufacturing, and dependable logistics, we ensure every project receives exceptional quality, consistency, and service, wherever it's built.
